Introduction to JavaScript

By Kaustubh Ghadge from [Coding Bootcamps](#)

Hello!

I am Kaustubh Ghadge
("KG")

A senior instructor at
coding-bootcamps.com

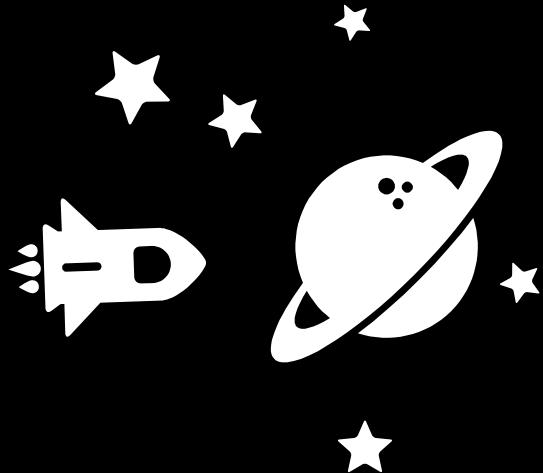

Session Outline

1. Recap of previous sessions
2. Manipulate DOM for getting the information
3. Print out the results on to the DOM

RECAP

PROJECT

Build a simple calculator

Project Scope

Create a simple HTML form that collects two values for following arithmetic operations:

- Addition
- Subtraction
- Multiplication
- Division
- Modulus

Requirements

You must have all the necessary tools installed in previous session. However, if you haven't here are tools we will be using:

- Code Editor like Visual Studio Code or Sublime Text
- Google Chrome

Project Source Files

1.

Manipulate DOM

Manipulate DOM

- Create a HTML form to get two numbers
- Add button elements for the following:
 - Addition
 - Subtraction
 - Multiplication
 - Division
 - Modulus

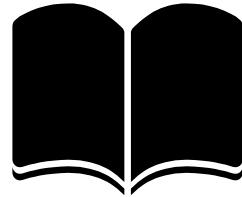

2.

**Printing results to
DOM**

Print Results to DOM

- Use Script tag to write JS Code
- Attach event handler of **onclick()** to button elements

Putting all things together
