

# Introduction to Node.js, Express.js and MongoDB

Coding-Bootcamps.com

## Session 2

Let's Code #1 - Hello World

- [Link](#)

Let's Code #2 - Explore fs + path modules

- [Link - Path](#)
- [Link - fs](#)

Let's Code #3 - HTTP Server

- [Link](#)

Let's Code #4 - Error Handling

- [Link](#)

## Session 3

Let's Code #5 - Scaffolding

```
$ npm install -g express-generator
```

```
$ express
```

```
$ express --view=pug myapp
```

Let's Code #6 - Creating Middlewares

- [Link](#)

Let's Code #7 - Routing

- [Link](#)

Let's Code #8 - Connecting to Database

- [Link](#)

Let's Code #9 - Error Handling

- [Link](#)

## Session 3

Let's Code #10 - Setup Atlas and Compass

- <https://docs.atlas.mongodb.com/getting-started/>
- <https://www.mongodb.com/download-center/compass>

Let's Code #11 - MongoCLI, Queries

- MongoCLI - <https://docs.mongodb.com/mongocli/stable/>
- Queries -

- Create Operations
  - `db.collection.insertOne()`
  - `db.collection.insertMany()`
- Read Operations
  - `db.collection.find()`
- Update Operations
  - `db.collection.updateOne()`
  - `db.collection.updateMany()`
- Delete Operations
  - `db.collection.deleteMany()`
  - `db.collection.deleteOne()`
